

NAK06-877SMF · Solid-flywheel conversion

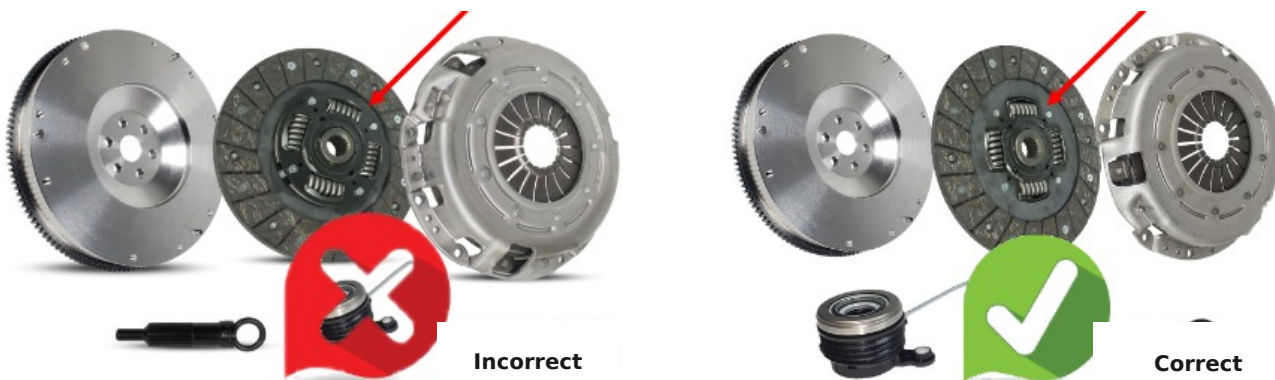

NAK06-877SMF · New design. Solid-flywheel conversion that replaces the entire original dual-mass flywheel (DMF) system.

Nissan application	Engine / transmission	Years
Sentra	L4 1.8L / 6-speed	2013-2019
Sentra	L4 2.0L / 6-speed	2007-2012
Tiida	L4 1.8L / 6-speed	2006-2018
Versa	L4 1.8L / 6-speed	2007-2012

The bulletin lists a one-piece solid flywheel, damped disc, hydraulic release bearing and alignment tool.

Disc orientation for this kit: flat side toward the pressure plate; raised side toward the flywheel.

This is the reverse of the usual orientation. The disc has no orientation marking; installing it backwards causes clutch-release problems.

Left: raised side toward the pressure plate, incorrect. Right: flat side toward the pressure plate, correct.

Warranty: diaphragm-to-disc rubbing caused by incorrect installation is not accepted under warranty.
